

The weather and traffic reports that XM offers are better than anything else that is currently available to me via the normal non-satelite radio stations. The traffic and weather reports that XM offers are more convient to me when I am on the road, as they cycle thru the available info in a much faster fashion than normal radio does. This allows me to make chnages to my drive wether I am going on a trip or just to and from work. The non-satelite radio alternative is poor and pales in comparison to what XM offers me as a consumer. Please do not stop XM from offering this service! It's worth it to me to pay for such high quality of programming, be it for entertainment or information.
Sincerely,

Eric Helsley
